## SUMMARY

Fresh Graduate in Informatics Engineering with a GPA of 3.50/4.00 and hands-on internship experience at a State-Owned Enterprise (PT PLN Indonesia Power) and a government agency (Bappelitbangda). Possesses a solid foundation in software development, database management, and information system management, reinforced by international certifications from Certiport, Cisco, and Oracle. Proven track record of enhancing operational efficiency and data digitalization through strong technical skills, problem-solving, and cross-functional team collaboration. Ready to contribute proactively to corporate digital transformation initiatives.

## EXPERIENCE

### HR Staff Intern

PT PLN Indonesia Power UBP Jabar 2

February 2025 – Mei 2025, Palabuhanratu

- Digitalized and managed over 200 employee records using Microsoft Excel and digital archiving systems, improving HR document governance efficiency by up to 30%
- Developed spreadsheet-based data recapitulation automation methods, accelerating archive retrieval speed and reducing data entry error rates by 25%
- Collaborated with Command Center and IT Support teams to maintain and synchronize operational data, ensuring internal reporting system accuracy

### IT Support Intern

Dinas Bappelitbangda Sukabumi

July 2024 – September 2024, Kabupaten Sukabumi

- Handled an average of 10+ technical support requests per week involving hardware, software, and network troubleshooting, reducing staff operational downtime by up to 15%
- Assisted in the installation and configuration of Windows OS, Microsoft Office, and basic networking devices to support smooth agency operations
- Implemented an IT documentation system that increased team response speed by 20%
- Collaborated with internal teams to optimize technology infrastructure in support of administrative tasks and projects

## PROJECT

### Asthma Diagnosis Expert System

Nusa Putra University • February 2026 – May 2026

- Designed a web-based expert system using the Certainty Factor method to analyze clinical symptoms and automatically classify asthma severity levels
- Developed a digital reporting module enabling users to download diagnostic analysis results directly in PDF format
- Built an admin monitoring dashboard equipped with Excel data export features to streamline user history tracking and data recapitulation

### QR Code-Based Employee Attendance System

PT Sigap Jaya Sampoerna • July 2025 – September 2025

- Developed a digital attendance system utilizing QR Code scanning to modernize and streamline real-time employee attendance tracking
- Engineered attendance data validation mechanisms and database integration to prevent spoofing and maintain high data accuracy
- Constructed a management dashboard with dual-reporting capabilities, allowing administrators to export bulk attendance data to MS Excel and individual records to PDF

### Book Collection Application

Nusa Putra University • October 2024 – November 2024

- Developed a mobile application featuring full CRUD capabilities to manage book collection data
- Designed a responsive user interface and integrated external REST APIs.
- Conducted live demonstration testing to validate application performance and usability

## EDUCATION

### Bachelor of Science (B.S.) in Informatics Engineering

Nusa Putra University • Sukabumi, Indonesia • 2022 – 2026 • 3.50

## CERTIFICATIONS

### MTCNA

MikroTik • 2026

## Software Development

Certiport – A Pearson VUE Business • 2025

## JavaScript Essentials 1

Cisco Networking Academy • 2025

## Training and Test Public Speaking

The Energetic EPDC • 2025

## Database

Oracle Academy • 2025

---

## INVOLVEMENT

### Head of Student Talent and Interest Division

Informatics Engineering Student Association (HMTI) • September 2023 – October 2024

- Spearheaded the planning and execution of technical training programs, tech seminars, and programming competitions
- Coordinated division team activities to foster student engagement in technology and digital innovation
- Executed targeted initiatives to channel student talent in IT fields, including coding workshops and tech contests

---

## SKILLS

Frontend Development: HTML5 CSS3 JavaScript TypeScript React Tailwind CSS Bootstrap

Backend Development: PHP Python Laravel Node.js MySQL MongoDB

Skills 3: Microsoft Excel (Advanced), Git, Meta & Google Ads, SEO, Digital Marketing, Problem Solving, Adaptability, Time Management, Communication & Team Collaboration
